

# INTELLIGENT ENERGY MONITORING

360energysolutionsinc.com | 800-975-6013

## BRING VISIBILITY TO YOUR ENERGY USAGE!

The 360 ESI Energy Monitoring System offers real-time, facility wide and circuit level energy measurement and monitoring that gives actionable analytics and monthly reporting that bring transparency and visibility to what is using energy and when, which allows for more informed decisions to reduce energy. The real-time information can also help justify maintenance and operation costs, detect when problems occur to reduce downtime costs, and help improve facility performance all focused on saving energy and **IMPROVING THE BOTTOM LINE!**

### Benefits of Energy Monitoring:

**Energy Savings:** Discover precisely where your energy expenditures are taxing your facility's resources at a fraction of the cost of traditional energy management systems.

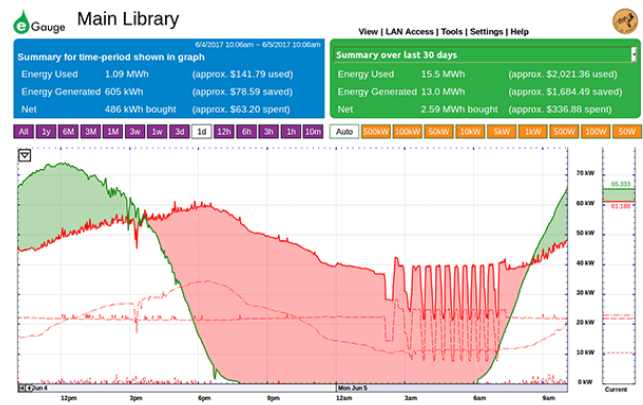

**Facility Operations Visibility:** Improved production performance and visibility with device level data and benchmarking capabilities.

**Preventative Maintenance:** Identify unseen problems and predict failures through real-time alerts before they lead to thousands of dollars in wasted energy and/or equipment failures.

**Operational Cost Reduction:** Quickly determine through benchmarking when systems are not functioning properly to detect hidden operational inefficiencies and energy waste.

### Features of the 360 ESI Energy Monitoring System

- UL Listed Equipment
- CE and CSA Marked
- Individual Circuit Monitoring Capability
- Text or Email Alerting System
- NO Ongoing Subscription Fees
- Lifetime Data Logging Capacity
- Easy Installation
- Live Energy Usage Graph with Real-Time Data
- 1-Year Warranty

## Visibility and Transparency = Energy Savings and Improved Bottom Line!
